Professional Objectives

Looking for a key role on IT management and administration of a leading IT or Telecommunications company where I can manage to forward company and self to a better innovative position in the IT industry by developing next generation technologies and systems.

Professional Qualifications

- 5+ years of Hands-on Administration experience on Linux, Solaris, Windows Server systems
- 5+ years of Hands-on experience on integrating hardware and software
- 2 years of Database clustering and super computing experience
- Reputation for preventing problems, as well as solving them

Professional Experience

Mobilada 2010-
Mobilada is a startup specializing in Mobile Service Technologies which me and my colleague Deniz Bahadır formed in 2010. We have created MicroPayment solutions, Web Applications and WebScraping solutions for our customers. Also we have created some open source projects for Joomla cms.

Gen3 2008-2009
Gen3 is a startup interactive agency company formed by 3 of my colleagues at late 2007. I've joined the company as a co-founder in 03/2008 and sold my shares at the end of 2008. I've experienced building and administring a startup from ground up. Also did all systems administration and Flash action script coding till end of occupation. While me and my colleague Deniz Gür working in the company we built some Mobile technology based products for Turatel.

Parkyeri Communication 2005-2007
Parkyeri is a mid-sized 30 personal employed company with the professional background of gsm value added service implementing, coding, hosting and e-trade software developing and hosting solutions

Certifications

- RHCT - Red Hat Certified Technician 2007
Certificate Number: 604006266710804
- Applied CMMI/XP Education Certificate 07/2006
Nitelik Consulting

Consultancy

. Migrating Fedora – Qmail mail servers to Debian – Postfix for Atiktuk IT Services and installation on 2 servers. For this consultancy i migrated available email accounts and data without any data loss to postfix and Courier Maildrop services. Also I've planned and install mail listing software Mailman and Backup policy. For the sake of easy administration I installed Webmin on Companies Will. <http://www.atiktuk.com>

. Fedora Linux education for RTUK SKAAS team via Portakal Technology - 5 days
<http://www.portakalteknoloji.com> <http://www.rtuk.gov.tr>

. Basic Linux training at a Turkish military base for Portakal Technology. - 5 days

Projects

- <http://www.gorfonline.com> Online Corporate BulkSMS solution. Php – Javascript - JQuery – Ajax coding for Turatel.
- Gen3 – Flash-Php coding on “Get You Island On © Screen Saver Creator” for Malibu Turkey.
